C5 Mini
Color doppler

C5 Mini Color Doppler Ultrasound System

clear image! Powerful functions!
High performance! Cost effective!

Comprehensive Clinical Application Solutions

- Transducers with broad frequency band and various frequencies
- Automatic trace on PW frequency map
- 2D, color and Doppler frequency conversion
- Real time dual-display 2D images and color flow images
- One key saving and restoring image parameters helps shorten operating time effectively
- Measurement packages of all parts meet with clinical needs of different applications

Super Data Management System

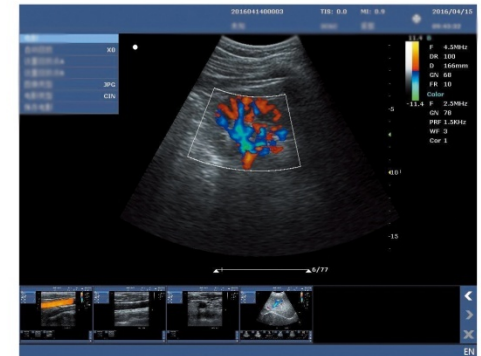

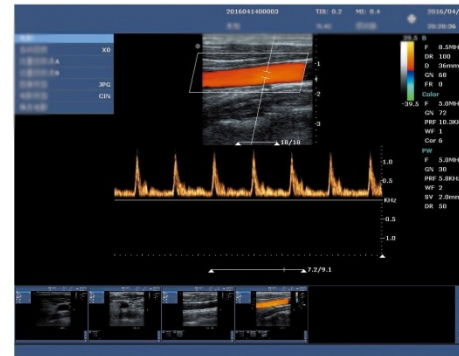

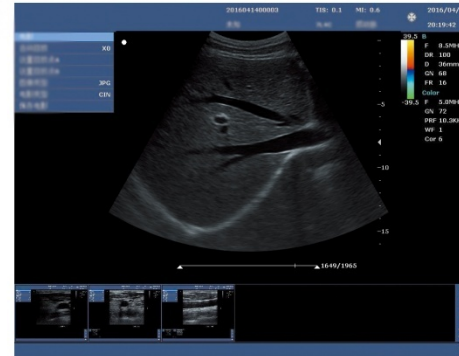

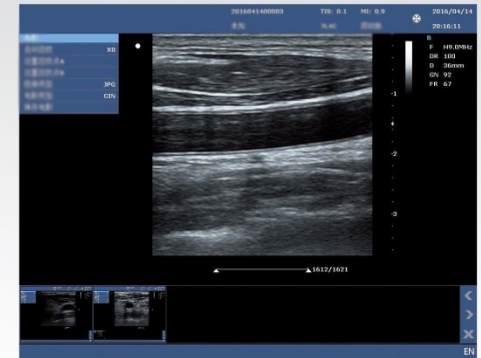

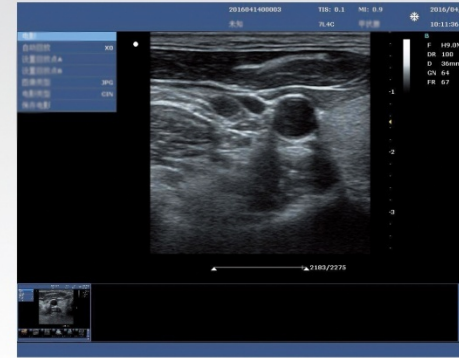

- One key saving for cines and files improve the working performance
- Built-in workstation helps quickly searching patient data and reviewing cines
- The supported DICOM 3.0 can communicate with PACS system of the hospital seamlessly

Advanced Imaging Technologies

- High precision dynamic focus imaging
- Spatial compound imaging
- Frequency compound imaging
- Multi-beam Formation technology

Large screen User-friendly design

- 15 inches high definition medical use LCD screen, wide view angle, clear image
- Backlight control panel, easy to operate
- Large built-in battery set
- Various input/output ports

Versatile Probe Options, Various diagnosis applications

- Convex probe, linear probe, microconvex probe, endocavity probe
- Applications: Abdomen, OB/GYN, Urology, Cardiology(fetal), Small
- Parts, Pediatrics. Vascular
